

Ashara Morris

**Animal Intuitive / Reiki Master
/ Certified Equine Gestalt
Coach**

**Helping people with pet
behavior issues, grief and
loss, and relationship
deepening**

"Shakti definitely, I mean *definitely*, got your message and started hanging out more in lower places where I can reach her! And she's gotten more affectionate. Even sat on my lap a few times in the days after our call. She's let Blueberry take over the high spot on the cat tree. ... I consider our session to be surprisingly impactful..." C.A., California

"I truly enjoyed your lecture and I feel inspired by what you said. ...I think everyone walked away with a sense of peace and possibility for what might be." T.D., Denver, CO

"Ashara is a talented animal intuitive, and engaged my cat, Boone in quiet conversation – listening, hearing and helping explore where he hasn't felt well and what next steps we should take." K.G., Evergreen, CO

About Ashara

Speaking Topics

"What in the World are the Animals Telling Us?" (45-60 Minutes)

This talk is about how the animals of the world are communicating with us to help us through our lives. We examine animal communication and how it works, and do a couple of short interactive exercises around energy and how that helps us "hear" the animals. If time allows, we will also talk with a couple of the animals owned by people in the audience. The animal does not need to be there, however, if they have a picture of the animal, that is always fun.

"Animals as Healers" (30-60 Minutes)

What is it about how animals interact with us? Why did that difficult animal come into your life? Do you see a pattern in the way your animals react in your family, your home, with you? They come to us for very particular reasons, and an exploration of how we interact with them and the challenges they present can lead us to our own healing.
